

Wellness testing

Early detection and prevention are the most important reasons to screen every pets bloodwork once a year. To ensure your pet is healthy, we run tests, in clinic, to confirm that your pets organs are functioning properly and to find hidden health conditions that could put your pet at risk. We've all heard that one year in a dogs life, is like seven years in our own lives, so really once a year testing is similar to ourselves having bloodwork done once every seven years. The four top reasons to have bloodwork done on your pet annually are:

1. **Enjoy peace of mind.** Testing can significantly reduce medical risk.
2. **Detect hidden illness.** Healthy looking pets may be hiding symptoms of a disease or ailment. Testing helps detect this kind of illness so we can avoid problems in the future.
3. **Reduce risks and consequences.** If the wellness testing results are normal, we can proceed with confidence. If not, we can alter any future anesthetic procedures or take other precautions to safeguard your pets health.
4. **Protect your pets future health.** These tests become part of your pets medical record, providing a baseline for future reference.

Call us if you have questions or need more complete information about your pets health.

Prevention is Protection
